

Teacher of Physical Education & Science

The Corbet School is an 11-16 Secondary School of 734 pupils, which enjoys an excellent reputation and has achieved consistently high results over a number of years.

The school has a very experienced staff, and is looking for a talented individual to join the team. The major part of the role is to teach Boys PE to KS3 & KS4 (approximately 0.8FTE), and to teach Science as a second subject at KS3 (approximately 0.2 FTE).

All teachers in the school are also required to be Form Tutors and be involved in the teaching of Personal, Social and Health Education.

Physical Education

The PE Department is a highly supportive and successful team who provide an enjoyable and inclusive programme of sport and physical activity in a safe learning environment. They provide opportunities for every pupil to develop physically, socially and emotionally, allowing them to reach their full potential. The department continuously achieves excellent examination results. In addition, they also provide a wide range of opportunities for extra-curricular participation, pupil leadership opportunities, inter and intra schools' competition and successful school trips.

The school aims to appoint an enthusiastic teacher of PE who has excellent organisation and communication skills and can bring energy and positivity, to compliment the environment which already exists within this highly regarded department.

Science

The department requires the support of a KS3 teacher due to an expanded timetable being created by an increase in the number of pupils on role. The requirement is for approximately four or five periods per week (0.2FTE).

At KS3 pupils study combined science (biology, chemistry & physics) for 3 periods per week in years 7,8 & 9.

There is great experience within the current team, and a willingness to provide support and development as required. In addition there is a successful early years career programme across the whole school to enhance the early career experience.

The successful candidate will need to demonstrate a real desire to develop their own Science teaching, build on the strengths of the department, and enhance their personal skill set.

Summary

This is a fantastic opportunity to join a very successful and ambitious school, where your enthusiasm and commitment will be matched by support and encouragement, in order to ensure you get a great start in your chosen career.
